End-to-End Event Sequence & Operational Flowchart

Wedding Microsite, Ceremony Itinerary & Fractional Sq.Ft. Gift Repository

STANDARD OPERATING WORKFLOW

Phase 1 Master Stage Progression: Setup to Post-Wedding Settlement

Phase 2 Stage Breakdown & System Deliverables

Stage	Key User Actions	System & Automated Logic	Milestone Output
Stage 1: Setup	Couple selects RERA apartment, inputs total area (1,200 SFT) & target pricing.	Generates coordinate-mapped 2D vector floor plan with individual tile identifiers.	Configured microsite database & tripartite escrow virtual account ready.
Stage 2: Invites	Hosts upload wedding video invite & import guest contacts via CSV/web portal.	Generates dynamic query URLs; executes WhatsApp automated batch broadcast.	Personalized smart invite links received by guests with 1-click calendar sync.
Stage 3: RSVP	Guests click smart link, submit attending status, headcounts, dietary & stay needs.	Syncs responses to live Couple Dashboard; triggers automated WhatsApp confirmation note.	Real-time catering numbers, airport shuttle requisitions & hotel rooming list.
Stage 4: Gifting	Guests pick 1, 5, 10 or custom SFT tiles; enter personal blessing & complete UPI checkout.	Locks tile for 10 min during checkout; settles payment directly into RBI-regulated escrow.	Instant WhatsApp payment receipt with marriage tax note & tile ownership pin.
Stage 5: Wedding	Guests scan banquet QR stands; upload live event photos; view ceremony countdown.	WebSockets ingest incoming blessings; real-time projection wall updates apartment progress.	Interactive venue screens showing 420/1,200 SFT completed & live photo carousel.
Stage 6: Payout	Escrow bank executes dual-authorization wire of pooled gift corpus to developer.	Validates builder RERA project account; marks mortgage/down-payment credit note.	Physical framed "Founding Wall" architectural memento delivered to couple.
